About the Conference

The nature of development has continuously changed and shifted fundamental factors across the timeline. Digital globalization is a new form of globalization, others liken digitalisation to the globalization that needs to be managed and driven so that institutions and businesses can meet the challenge of digitalisation together. Digitization has encompassed all aspects of economic and social life. Living standard of people has highly risen up and has become sophisticated due to technology. Digital Technology has transformed the world into a global village by globalization. It has a crucial impact on fundamental aspects of all our cultures including language, art, mobility, education, communication and politics also. Every nation and its community has its own identical coherence, culture, tradition and social norms and values. The purpose of the conference is to deliberate on how new technology adoptions have affected globalization, traditional and social norms and values etc. This conference investigates the impact of globalization on the international digital adoption rate.
